

Title: Data Source Report

Task 1: Data Collection & Data Source Identification

Intern Name: Sakshi Tiwari

Organization: EduTech Solution

1. Dataset Name:

Netflix Movies and TV Shows Dataset

2. Source:

Kaggle Link:

<https://www.kaggle.com/datasets/shivamb/netflix-shows?resource=download>

4. Format:

CSV (Comma Separated Values)

5. Rows & Columns:

8807 rows, 12 columns

6. Data Type:

Secondary Data

7. Columns Description:

- show_id: Unique ID
- type: Movie or TV Show
- title: Name of the show
- director: Director name

- country: Country of origin
- date_added: Date added on Netflix
- release_year: Year of release
- rating: Age rating (PG, R, etc.)
- duration: Length of movie/episodes
- listed_in: Genre

8. Why This Dataset:

This dataset is publicly available, well-structured, and suitable for performing data analytics tasks like trend analysis, content distribution, and genre insights.

9. Primary vs Secondary Data:

This is Secondary Data because it was collected and published by a third party (Kaggle), not by us directly.
